EPM Global Services Inc. Increases Global Manufacturing Capacity

Toronto, Ontario – EPM Global Services Inc., a leader in the delivery of Electronics Manufacturing Services, has announced the expansion of its global manufacturing capacity.

During the first quarter of 2008, EPM's total manufacturing capacity will be increasing by 20% with significant expansion in its Asian facility. The expansion will double the manufacturing capacity of its Asian operations and is scheduled for completion by the end of Q1, 2008.

James McColl, President and Chief Executive of EPM, says that the company's expanded global manufacturing capacity will allow EPM to provide its customers with more value added services and more global sourcing options. "With our increased capacity, EPM Global Services is able to effectively support increasing demand from our present customer base as well as with new customers. Our global infrastructure continues to successfully provide our customers with access to our unique Hybrid Manufacturing Solutions supply chain model that ties global supply chain reach with local North American program management. Our need to increase our manufacturing capacity is proof of our success with the HMS model."

As part of the revamped manufacturing structure, EPM has reorganized its operations in Manchester, New Hampshire to be its US center for Direct Order Fulfillment and Reverse Logistics services. EPM Manchester continues as the US hub for all of EPM's US Sales, Marketing and Customer Support services. "The revamped structure, combined with our increased manufacturing capacity will continue to offer our US customers with smart options to leverage EPM's global presence in an effective manner" added Mr. McColl.

EPM has developed its Hybrid Manufacturing Solution (HMS) to leverage the inherent benefits of integrated global manufacturing. Cyril Fernandes, Senior Vice President Marketing and Corporate Development, describes HMS as a "...a fully scalable supply chain model, addressing the manufacturing transition of a program/product as it moves through its lifecycle. It enables small to mid volume organizations to take advantage of the global supply chain through North American representation and support without the headache of time differences, language barriers, and cultural differences."

About EPM Global Services Inc.

EPM Global Services Inc., recognized in 2006 by PROFIT Magazine as one of Canada's fastest growing companies, is a leader in the delivery of electronics manufacturing services (EMS).

Unique to its size and customer base, with a history of specializing in low to mid-volume, high complexity programs, EPM provides a sophisticated global supply chain network with operations in United States, Canada, Hong Kong and China. EPMs' expertise in supply chain management, manufacturing, technology and quality provides a competitive advantage to its customers by improving time-to-market, and global scalability to provide an entire suite of manufacturing options tailored to meet customers' needs.
